

TaurangaCity

Job description

Title	Senior Drainage Operations Engineer
Number	
Group	Infrastructure
Division	City Waters
Reports to	Manager: Drainage Services
Direct reports	None
Date	1/06/25

Job holder commitment

The job holder accepts as a fundamental requirement of their employment that they must demonstrate a personal commitment to:-

- modelling organisational values at all times
- a safe and healthy work environment
- assisting Council to fulfil its Civil Defence responsibilities

Job purpose

The primary purpose of this role is to be responsible for the operational strategy and asset management of the City's stormwater and wastewater systems including the management of network asset maintenance work carried out by Council's contractor. In addition to manage the incorporation of developer and third party vesting of infrastructure and the implementation, renewal and upgrade of network assets, interfacing with internal and external customers and stakeholders.

Key outcomes

Deliver safe and efficient drainage network services and operational assets for the community.	<ul style="list-style-type: none">• Manage and develop the delivery of the city's wastewater and stormwater systems• Expert advice on the implications of plans, discussion documents and policies of other agencies and other local government bodies relevant to the networks operations and services is provided.• Expert technical advice provided to all stakeholders who work on and around the wastewater and stormwater networks including significant growth and development projects.• Ensure assets meet requirements under the IDC and provide expert advice that ensures quality outcomes where infrastructure departs from it.• Proposed infrastructure meets TCC standards for operations and maintenance meaning quality assets are vested.
---	---

Professional relationships are developed, maintained, and leveraged to achieve business goals.	<ul style="list-style-type: none"> Professional relationships with external and internal stakeholders and customers are developed and maintained. Fostering strategic relationships within the water industry, with government organisations, regulators and external suppliers to achieve business goals. Develop and maintain a strong partnership with TCC's maintenance contractor and other external resources involved in maintaining drainage systems. Provide sound engineering advice to the Drainage team and City Waters.
Manage finances for drainage operations as needed.	<ul style="list-style-type: none"> Maintenance budgets for stormwater and wastewater reticulation are managed. Reports and advice are provided on drainage renewal budgets. Set programme for renewals works utilising experience of the networks and relationships within asset management and project outcome teams

The job description is not an exhaustive list of requirements, the job holder will be required to perform tasks assigned to them that are not explicitly described in this document.

Essential person specifications

- NZCE (Civil) with REA registration or other relevant qualification.
- 10 years' experience in the skills/competency's areas described above.
- Proven experience in contract management both new project works and maintenance contracts.
- Proven experience, knowledge and skills in wastewater and stormwater network systems.
- Knowledge of Local Authority Engineering Standards.
