

TaurangaCity

Job description

Title	Development Engineer
Number	3AD23E
Group	Regulatory Support and Community Services
Division	Regulatory Support and Compliance Services
Reports to	Team Leader: Building Engineers
Direct reports	N/A
Date	16/09/2026

Job holder commitment

The job holder accepts as a fundamental requirement of their employment that they must demonstrate a personal commitment to:-

- modelling organisational values at all times
- a safe and healthy work environment
- assisting Council to fulfil its Civil Defence responsibilities

Job purpose

The primary purpose of this role is to ensure the engineering aspects of building consent applications are assessed efficiently and consistently in accordance with legislative requirements, the Building Code, accepted engineering standards, and Council requirements.

Key outcomes

Ensure that quality infrastructure is constructed and risk is managed for new developments in terms of Safe Build-sites and Landforms.	• Review, evaluate and provide specialist opinion and input building consent applications on geotechnical and other natural hazards, land and infrastructure development and compliance with required standards using judgement and best practice engineering. • Take responsibility for building consent applications assigned. Provide specialist opinion and ensure the engineering aspects are effectively addressed and that they meet the relevant requirements of the Building Act. • Take responsibility for development applications assigned. Ensure the engineering aspects are effectively managed from consent application stage, through development works construction to final sign off. Ensure liaison with asset managers, planners and other key staff occurs and that completed development meets appropriate standards.
